2025 FALL BULL SALE
DECEMBER 1, 2025
ONLINE AT [DVAUCTION.COM](https://dvauction.com)

BUY THE BRAND. OWN THE LEGACY.

Welcome to King Ranch's 2025 Fall Bull Sale. We are proud to make this the first public offering of a bull crop in over 20 years. These cattle represent 170 years of innovation from one of the largest vertically aligned cattle operations in the U.S. Backed by one of the largest cattle databases in the world and developed in one of the harshest environments in the country, you can have confidence in the product. Our goal is simple: Make the most profitable genetics possible. Here's your chance to leverage the latest Profit PROVEN® genetics to help put the most money in your pocket. We're excited about opportunities that lie ahead, and we hope you'll be part of our journey.

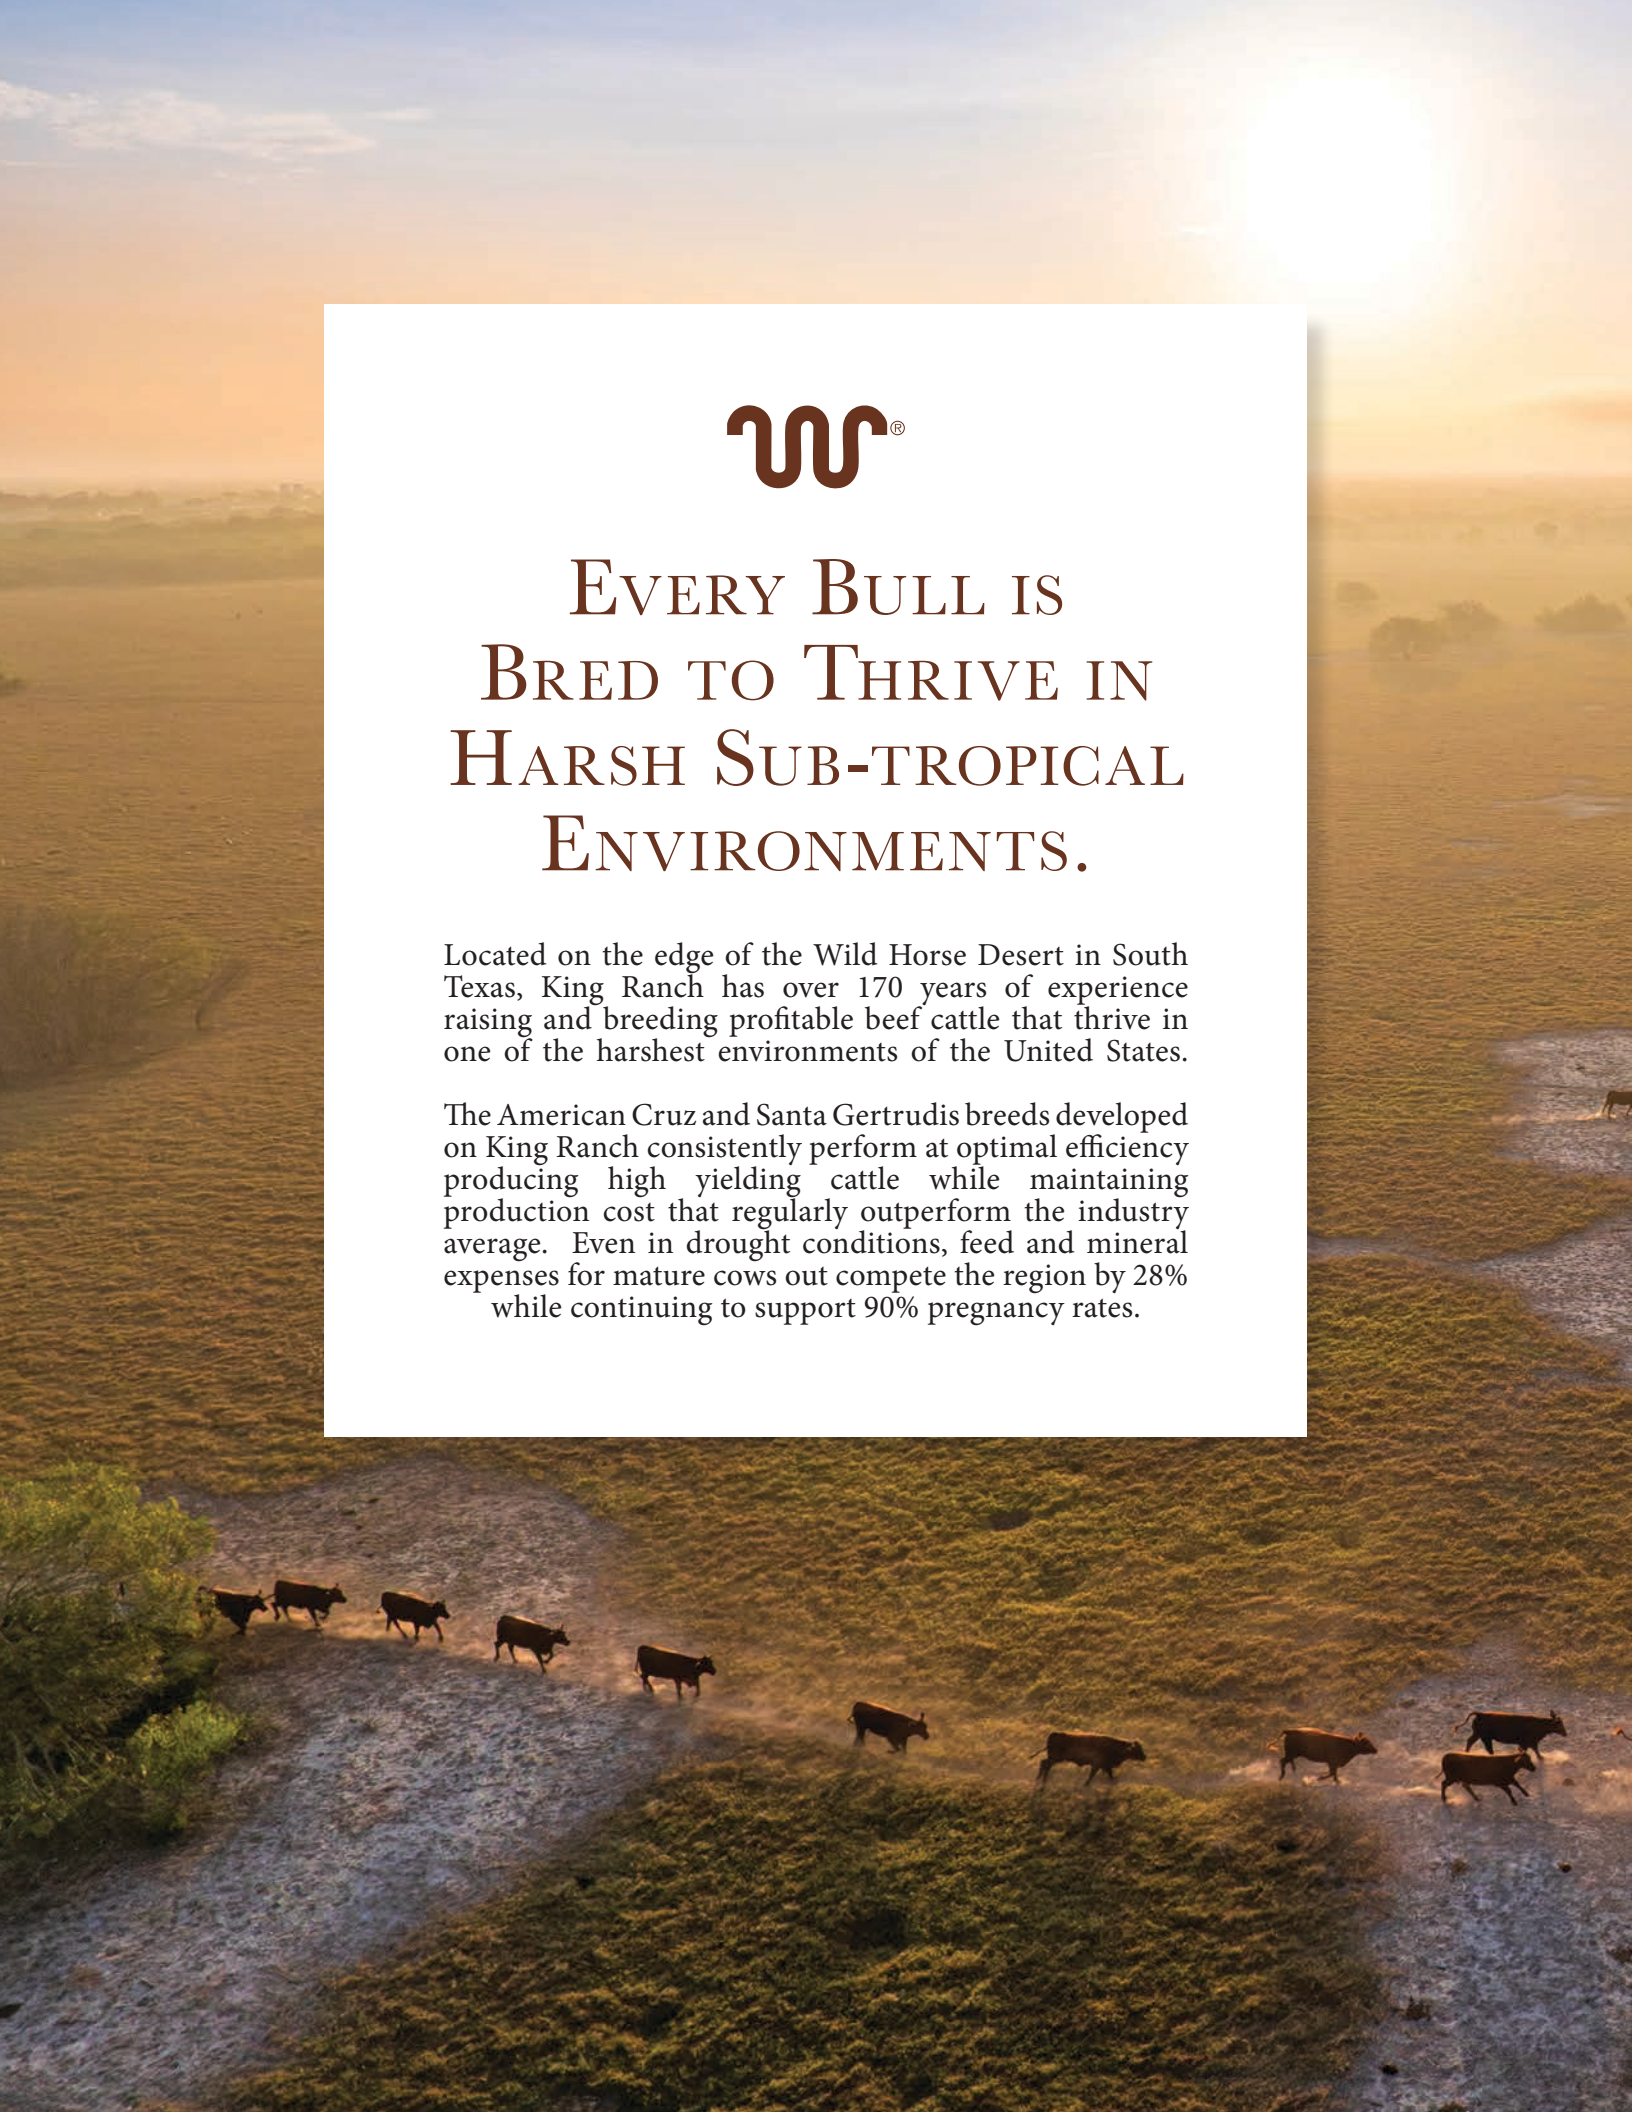

EVERY BULL IS BRED TO THRIVE IN HARSH SUB-TROPICAL ENVIRONMENTS.

Located on the edge of the Wild Horse Desert in South Texas, King Ranch has over 170 years of experience raising and breeding profitable beef cattle that thrive in one of the harshest environments of the United States.

The American Cruz and Santa Gertrudis breeds developed on King Ranch consistently perform at optimal efficiency producing high yielding cattle while maintaining production cost that regularly outperform the industry average. Even in drought conditions, feed and mineral expenses for mature cows out compete the region by 28% while continuing to support 90% pregnancy rates.

MONDAY, DECEMBER 1, 2025 **2:00 PM BULL SALE** **ONLINE ONLY AT DVAUCTION.COM**

The Running W brand was first registered in 1869. Some have said that it represents one of the Ranch's many diamondback rattlesnakes or the Santa Gertrudis Creek, while others are sure it signifies the sweeping horns of a Texas Longhorn. The Running W could also be interpreted as a section of a continuing wave pattern – signifying the uniting of the past with the present and suggesting continuity into the future.

THIS SALE IS ONLINE ONLY AT

OUR FOREMOST GOAL REMAINS THE CREATION OF
THE MOST PROFITABLE AND EFFICIENT RANGE COW.

DEVELOPED BY THE KING
RANCH, SANTA GERTRUDIS
CATTLE CONTINUE TO DEFINE
MATERNAL STRENGTH AND
PERFORMANCE IN THE
TOUGHEST CONDITIONS

King Ranch continues to be home to industry-leading Santa Gertrudis genetics using time-honored techniques and the latest genetic and reproductive technologies. Whole herd reporting and high-density SNP panels from the largest, most comprehensive genetic evaluation in the breed results in highly accurate predictions for fertility, longevity, efficiency, and carcass quality. This historically outstanding maternal breed continues to make impressive improvements in feeder calf performance.

AMERICAN CRUZ

These genetics are 40 years in the making. They combine the profit-driving maternal characteristics of Santa Gertrudis with the most modern Red Angus genetics. This mating produces females with proven longevity, consistently productive well beyond 10 years of age, and a feeder calf in high demand due to improved feed yard performance and an above average carcass value.

Robert Silguero, Manager of Seedstock Operations, and Virginia “Ginny” Silguero, Genetic Specialist and Bull Sales, lead the King Ranch seedstock program with a shared commitment to advancing performance, efficiency, and adaptability.

EXPECTED PROGENY DIFFERENCES (EPDs)

EPDs predict how an animal's offspring will perform compared to others in the breed, using pedigree and performance data. They are the most reliable measure of genetic merit and help producers select traits that align with their operation's goals and environment.

Birth Weight (BW): Predicts calf size at birth and calving ease.

Weaning Weight (WW): Indicates growth to weaning (205-day adjusted).

Yearling Weight (YW): Measures growth to one year (365-day adjusted).

Milk (MK): Reflects the dam's milk contribution to weaning weight.

Total Maternal (TM): Combines Milk and WW to show maternal ability.

Scrotal Circumference (SC): Indicator of bull fertility and heifer puberty.

Heifer Pregnancy (HP): Likelihood a heifer conceives as a yearling.

Breed Back (BB): Likelihood a two-year-old rebreeds after first calving.

Carcass Weight (CW): Predicts differences in hot carcass weight.

Ribeye Area (REA): Indicates muscling between the 12th–13th ribs.

Marbling (MB): Predicts intramuscular fat and carcass quality.

Backfat (FT): Measures fat thickness over the ribeye.

INDEX DEFINITIONS

Balanced Index

For herds retaining replacements and marketing feeders on carcass value; includes all traits except Carcass Weight and Backfat.

Cow/Calf Index

For herds selling calves at weaning; emphasizes fertility, growth, and maternal traits.

Terminal Index

For herds marketing on carcass merit; focuses on growth and carcass quality.

BREED LEVELS EXPLAINED

Santa Gertrudis

Cattle designated as Purebred Santa Gertrudis are qualified to register as such with Santa Gertrudis Breeders International.

American Cruz

Cattle designated as American Cruz are a blend of Santa Gertrudis (SG) and Red Angus (AR) genetics.

DOCILITY SCORING

Each bull is evaluated individually on horseback to assess his response to pressure and interaction in a working ranch environment. This method provides a consistent and realistic measure of temperament and ease of management. Because these cattle are not accustomed to being handled on foot, evaluations are conducted in conditions that reflect how they are typically managed. While disposition varies among individuals, these scores offer useful insight for selecting bulls suited to your operation and handling environment.

SCORING SCALE

- 1 — Calm: Bull remains relaxed and moves quietly during evaluation.
- 2 — Alert: Bull shows mild awareness or increased pace when evaluated.
- 3 — Reactive: Bull shows noticeable unease or defensiveness under pressure.

TESTIMONIALS

“We’ve always liked the feedlot performance on these cattle. King Ranch has taken a sound base and made it better. My American Cruz females have proven to be fertile and efficient grazers. My assessment of these cattle is they are heat tolerant, healthy, highly efficient cattle.”

JOHN JOSSEAND, PRESIDENT, AZTX CATTLE CO., HEREFORD, TX

“We appreciate the high breed back percentage, correct udders, and weather tolerance of these cattle. They have done well in our area and we are slowly replacing our existing genetics with the American Cruz. Working with King Ranch has been an honor.”

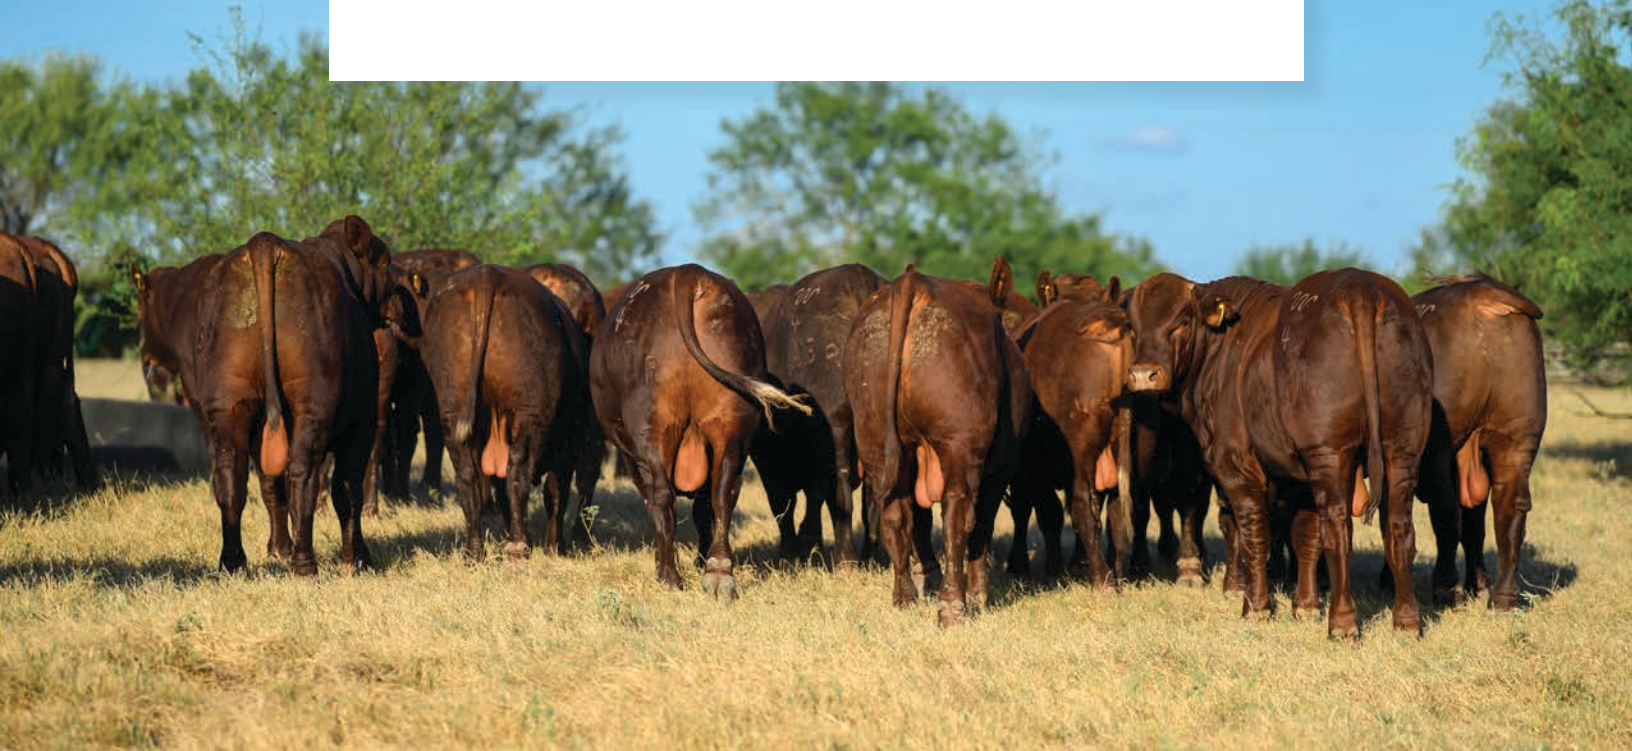

SEBO FAMILY, SEBO LAND AND CATTLE CO., SPIRO, OK.

“Acquiring Santa Gertrudis and American Cruz bulls from King Ranch has been an exceptional experience. The King Ranch team provided not only SGBI based EPDs but extensive additional performance data, from King Ranch’s own genomic-enhanced evaluations, and indices that allowed us to make highly targeted selections for our breeding program.

King Ranch’s representatives demonstrated deep expertise in matching bull profiles to specific operational goals, such as optimizing maternal and carcass traits. The extensive data provided and their willingness to discuss, made the process very efficient and provided high confidence in our selection.

The bull acquisition process at King Ranch is a benchmark in data-driven decision-making.”

We start the sale with a son of our up-and-coming Red Angus herd sire, Halfmann Discipline K418, this is the highest-indexing bull in the sale and part of K418's first calf crop. K418 is already making a strong impression for his consistency, balance, and ability to transmit performance across multiple traits. This F1 son ranks in the top 25% for nine key traits, including 15% for Birth Weight, 10% for Weaning Weight, and an impressive 1% for Yearling Weight. Additional highlights include 15% for Scrotal Circumference, 10% for Heifer Pregnancy, 10% for Breed back, 10% for Carcass Weight, 25% for Ribeye Area, and 10% for Marbling. A powerhouse individual that blends growth, fertility, and carcass merit—an ideal choice for breeders looking to accelerate genetic progress with confidence.

A Purebred son of the renowned QVF Jackpot 5369G8—an individual that exemplifies balance and genetic excellence. He ranks in the top 10% across all indexes and lands in the top 25% for six key traits. His dam is sired by KR 461/10, a bull known for his excellent phenotype and bone, adding structural quality to this already impressive genetic package. This combination of carcass quality and calving ease makes him an exceptional candidate for progressive breeding programs focused on all-around profitability.

REFERENCE SIRE: KING 55/0****55

LOT 14A - KR LEGADO 2080/24

The Legacy of “King 55” Lives On.

To celebrate the return of our sale, we're proud to offer this special Buyer's Pick Lot, featuring two sons of our cornerstone Santa Gertrudis sire, “King 55.” Born more than five decades ago, King 55 played a defining role in shaping the foundation of our herd and left a lasting legacy of structural integrity, fertility, and performance. We've brought his timeless genetics back to the forefront, combining them with some of our most proven lines. These two bulls—Lot 14A and 14B—embody the perfect blend of tradition and progress, giving buyers the opportunity to own a piece of history backed by generations of real-world results.

KR Legado 2080/24 represents a refined blend of heritage and performance. Legado—Spanish for “legacy”—reflects the enduring impact of the genetics behind him. Sired by our cornerstone Santa Gertrudis bull King 55 and backed by the proven KR1210R/14 line, he combines time-tested genetics with modern performance. The result is a bull that offers exceptional maternal strength, fertility, and breed character—a true nod to the past with performance built for the future.

The second half of our Buyer's Pick Lot, KR Linaje 2143/24 continues the celebration of proven genetics and breed influence. Linaje—Spanish for “lineage”—symbolizes the strength of the bloodlines he represents. Like his mate, he is sired by our legendary herd sire King 55, whose genetics have stood the test of time and remain a cornerstone of our program. On the dam's side, he traces back to KR 97/10, the sire of the influential KR 191/13 and a bull that produced more than 150 calves in our herd. This pedigree blends two of our most enduring sire lines, delivering a genetic combination that embodies longevity, consistency, and production power—true foundation genetics refined for the future.

5/8 AR, 3/8 SG • An impressive offering with terminal strength and proven real-world performance. He combines new-generation Red Angus genetics with our older, time-tested lines, creating a powerful blend of progress and dependability. He also stands out for his growth and maternal strength, ranking top 3% for YW, 3% for MILK. His dam has produced 11 calves to date, with 5 of her 6 bull calves qualifying for our gain test, averaging an impressive 4.66 IMF.

Another impressive bull sired by Halfmann Discipline K418. He features seven traits ranking in the top 25%, including 15% for BW, 10% for YW, 10% for SC, and an outstanding 3% for HP. His dam has been an important part of our donor program, with 4 of her 5 bull calves qualifying for gain test and averaging an impressive 4.32 IMF. KR2113/24 blends fertility, growth, and carcass performance—an ideal choice for breeders aiming to improve both productivity and genetic reliability.

1/2 AR, 1/2 SG • This balanced American Cruz bull, sired by Halfmann Discipline K418, continues the strong pattern of consistency and performance we've come to expect from this sire group. He is exceptionally balanced, ranking in the top 10% across all three indexes—a true reflection of K418's ability to produce uniform, high-performing offspring. With excellent growth traits and dependable structural soundness, he represents the kind of complete and predictable genetics that add value across a wide range of production goals.

1/2 AR, 1/2 SG • This good-looking American Cruz bull, sired by Halfmann Discipline K418, comes from a productive and proven female line. His dam has a strong performance record with four of her offspring making our gain test. He offers five traits ranking in the top 25%, including 15% for Birth Weight, 20% for Yearling Weight, 15% for Milk, 10% for Scrotal Circumference, and 20% for Breed Back—showing the consistency and performance this sire group continues to deliver.

1/2 AR, 1/2 SG • This impressive-looking son of Brown GTLS President J5500 combines eye appeal with balance and function. He traces back to KR 97/10 and is out of a dam that has been a part of our donor program, with seven of her offspring making our gain test and averaging an impressive 4.07 IMF. He offers balanced indexes and strong carcass traits, creating a good-looking, functional bull that delivers both style and substance.

3/8 AR, 5/8 SG • We close the sale with an eye-catching American Cruz bull, another grandson of the great BROWN INTERSTELLAR D352. He ranks in the top 25% for Weaning Weight, 5% for Yearling Weight, 4% for Milk, 5% for Scrotal Circumference, 15% for Carcass Weight, and 15% for Marbling. This combination of genetic strength, balance, and phenotype makes him an outstanding way to round out this offering

TERMS AND CONDITIONS

The following terms and conditions apply to the sale of registered or commercial cattle (bulls, cows, or heifers) by King Ranch, Inc. ("King Ranch" or "Seller") at the December 1, 2025 bull auction. Buyer's use of DVAuction, Inc.'s online auction services are also subject to DVAuction, Inc.'s terms and conditions located at <https://www.dvauction.com/terms>.

BIDDING

Each animal will be sold to the highest bidder without reserve. The auctioneer will settle any disputes as to bids, and his decision on such matters shall be final.

ANNOUNCEMENTS

Any changes of information of any kind in this catalog will be provided in a sale day supplement sheet or announced from the auction block and such information shall take control over any information included in this catalog.

TERMS

Terms of sale are cash at time of sale. The sale shall be deemed to occur upon the auctioneer's determination of the winning bid. For all bull sales, King Ranch retains the right to purchase up to 200 straws of frozen semen for in-herd or King Ranch Family use at the cost of collecting and freezing as billed by the collecting facility.

BUYER'S RISK

Each animal becomes the risk of the Buyer immediately upon loading but will not be loaded for shipment before payment has been received by King Ranch. The animals sold will be held by Seller for a period not to exceed ten (10) days. After ten days there will be a per head-day charge of \$10 unless freight is arranged by King Ranch.

FREIGHT

King Ranch will provide free delivery on purchases within 250 miles of Kingsville, TX. The Buyer must inform sale management of their desire to have King Ranch arrange free delivery upon the immediate completion of the sale.

VOLUME DISCOUNT

A 5% discount will be applied to the total purchase price for purchases of 5 to 9 head. A 10% discount will be applied to the total purchase price for purchases of 10 head or more.

CERTIFICATE OF REGISTRY AND CERTIFICATION

A transferred certificate of registry shall be furnished to the Buyer for each registered animal once payment has been received by King Ranch.

HEALTH

Interstate health certificates required for shipment to Buyer will be furnished on all animals. Any other test required for interstate shipment to Buyer will be provided. No guarantees as to health, immune status, or titer levels to any disease or pathogen, other than that cattle are in apparently good health and acceptable condition at time of loading, are warranted or implied.

GUARANTEES

1. "Bred" females sold as such have been examined by competent personnel using proper husbandry procedures and are so guaranteed at time of delivery. Buyer may examine females received (at their cost) within 3 days of delivery and return any open females for refund or replacement (seller option).
2. "Exposed" females have been pasture exposed to Sellers bulls of known breed composition but are not guaranteed to be "in-calf."
3. "Open" females sold as such have been examined by competent personnel using proper husbandry procedures and are so guaranteed at time of delivery. Buyer may examine females received (at their cost) within 3 days of delivery and return any bred females for refund, replacement, or cost of abortive treatment (seller option).

GUARANTEES, CONT.

4. All bulls have previously passed a fertility test administered by a licensed DVM. All bulls are guaranteed to be breeders if not allowed to run with the herd until at least 14 months of age. A bull shall be considered a breeder if he either 1) settles 35% or more of the healthy cows he serves; 2) is the sire of 20 or more calves; or 3) settles cows by natural service and passes a fertility test administered by a licensed and competent DVM during any 6-month period of trial (as outlined in paragraph 2 of the "Options and Privileges" section).
5. Any bull that has failed to prove himself a breeder within six (6) months of sale date, if in healthy condition and free from disease, may be returned at King Ranch's option. King Ranch reserves the privilege of trying, for a period of six months, to prove the bull a breeder. If proven a breeder, the bull will be returned to Buyer at Buyer's expense. Should the bull fail to prove a breeder in the specified period, an adjustment will be made as outlined in Options and Privileges section below.
6. All animals are sold "as-is" with no further fertility or other guarantees other than explicitly stated above.
7. Buyer guarantees that delivery of animals under these sales terms are legal and have met all State requirements for shipment under current Texas Animal Health Commission rules.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT

1. Returns and adjustments are limited to those guarantees outlined above.
2. All claims for return or adjustment must be made in writing within three (3) days of delivery date for females and six (6) months of delivery date for bulls.
3. Any return or adjustment provided for herein shall absolve King Ranch from further liability. King Ranch reserves the right to determine, on an animal-by-animal basis, which of the specific options in paragraph 4, 5 or 6 below is appropriate.
4. If a female is sold as "safe-in-calf" proves not to be "in-calf," or a bull fails to prove himself a breeder in a specified time as defined above, King Ranch shall, at Buyer's request, replace the returned animal with one of equal value, refund the purchase price of the returned animal or equitably adjust the purchase price.
5. If a female is sold as "open" proves to be "in-calf," the King Ranch shall equitably adjust the purchase price.
6. If a purebred Santa Gertrudis animal proves not to be eligible for registration under SGBI rules, King Ranch shall, at the Buyer's request, replace the returned animal with one of equal value, refund the purchase price of the returned animal or equitably adjust the purchase price.
7. Only those animals in healthy condition and free of disease may be returned pursuant to the above. Transportation of all returned animals is at Buyer's expense and risk.
8. The return or adjustment provided for herein shall be Buyer's sole remedy and King Ranch's sole liability with respect to this sale, whether by way of a claim in contract, tort (including negligence), strict liability or otherwise.

RIGHTS, OBLIGATIONS, AND LIMITS

1. The above Terms and Conditions of sale shall constitute a contract between the King Ranch and Buyer of each animal and shall be equally binding on both. Other than the guarantees stated above no other guarantees or warranties are expressed or implied, including without limitation the implied warranties of merchantability or fitness for a particular purpose. This document supersedes and replaces any prior or contemporaneous representations or other agreements with respect to the above animals.
2. Neither King Ranch, its management, nor any other person connected with the transaction assumes any liability, legal or otherwise, for any accidents or injuries, disease outbreaks, or other issues which may occur following the assumption of ownership of the animal by Buyer.
3. In no event shall King Ranch be liable for consequential, incidental, special, or other indirect damages, such as loss of profit or revenue, business interruption, cost of capital, etc., whether by way of a claim in contract, tort (including negligence), strict liability or otherwise.
4. The sale of each breeder hereunder shall be deemed to constitute a separate sale transaction.
